

Bring confidence to your safety program

Brady Safety Software and Services

Next level safety and compliance solutions

Make Brady your partner. Get expert guidance to put an effective program in place with our software, services and products for lockout tagout, electrical safety and confined space. When it comes to identifying and solving safety and compliance challenges in your facility, we offer a variety of solutions to take your program to the next level.

Bring confidence to your safety program

Your comprehensive safety program is an essential area of your business, helping to provide a safe and productive work environment for your employees, while also avoiding the costly impact of a violation or incident. Take a proactive approach and implement compliant, sustainable solutions to create a safety program that you and your employees can depend on.

Your safety solutions partner

Starting and maintaining a safety program can be daunting, but with the right partner, the process can be efficient, effective and completed with confidence. We provide a start-to-finish solution, which means we can jump in and help at any stage of your lockout tagout, arc flash and confined space program development. Rely on our in-house team of industry experts to work with you to create a world-class safety program that is sustainable and compliant, supported by:

- **Our insights:** Field engineers from different backgrounds to provide a variety of perspectives and find potential safety gaps others won't
- **Our services:** Industry-trusted expertise in lockout tagout, arc flash and confined space to keep you and your team protected
- **Our products:** Safety products and software designed by experts and engineered to perform

Services to create a safe facility

Whether you're establishing a new safety program, or looking for ways to take your program to the next level of world class, Brady offers a variety of services to fit your needs:

? Did you know

Lockout tagout compliance prevents an estimated 120 fatalities and 50,000 injuries each year.¹

Lockout tagout services

With a continually changing workforce, and frequent enhancements to processes and technology, there is a need in the industry to efficiently develop and train new workers to keep operations running smoothly. Having a sustainable lockout tagout program in place allows you to bridge the knowledge gap and improve safety throughout your facility.

Our lockout services include:

- Lockout tagout machine inventory
- Visual lockout tagout procedure writing
- Lockout tagout procedure audit
- Lockout tagout training, including general / affected, authorized and train-the-trainer programs
- Alternative method procedures / minor servicing
- Lockout tagout program development
- Lockout tagout gap analysis
- Time- and material-based services

? Did you know

Arc flash leads to more than 30,000 incidents and 2,000 hospitalizations per year.²

Electrical safety services

Creating a world-class arc flash program in-house requires time, engineered resources and power system analysis software to accurately calculate arc flash risk beyond general scenarios. Our electrical engineers work with you to create a solution that meets your needs, and keeps you compliant.

Our electrical safety services include:

- Arc flash risk assessment
- Arc flash assessment review
- Infrared thermography
- Qualified electrical worker training, including initial training, refresher courses and train-the-trainer programs

? Did you know

Confined space compliance could avoid 53 worker deaths and injuries, and 4,900 lost workday cases annually.³

Confined space services

When it comes to confined space, compliance starts with properly identifying and classifying these spaces. But the time it takes to complete the job can be hard to come by. Rely on Brady to collaborate with your team to determine the number of confined spaces and create an assessment of the known hazards to keep employees safe.

Our confined space services include:

- Confined space inventory and permit / non-permit classification
- Confined space hazard assessment
- Confined space training

LINK360® software for sustainable safety

From creating initial documents and approval processes to scheduling audits, there are a variety of activities required to keep your safety program up to date and sustainable. LINK360 software from Brady helps you set the standards, workflow and sustainability around your lockout tagout, confined space and preventive maintenance procedures so you can sustain a world-class safety program, without having experts on-site.

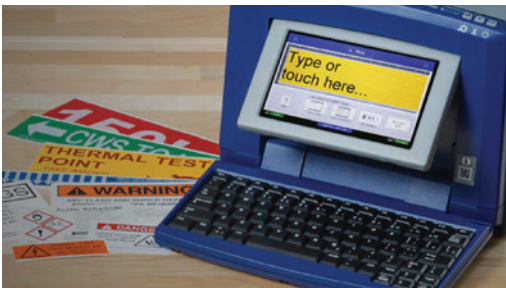

With LINK360 software you can:

- Easily create visual procedures and documentation for lockout tagout, confined space and preventive maintenance
- Benchmark, track and report your progress
- Generate procedure links to integrate with other systems and give contractors mobile access
- Consolidate password need and improve security with integrated single sign-on
- Take it with you on your mobile device to stay connected everywhere
- Convert your current procedures to LINK360 procedures

For on-the-go lockout projects, the companion Smart Lockout app is available to guide you through lockout tagout steps in the field.

Products to complete your safety solution

No safety program is complete without visuals and devices that alert and protect your employees from potential hazards. With Brady, you'll get all the products you need to advance your safety program, including:

Identification for arc flash, confined space and more

- Pre-printed safety and facility identification, including arc flash labels, confined space signs, barricade tape and tags, ANSI safety signs, HazCom labels and more
- On-demand printers to quickly and easily create the signs and labels you need for applications throughout your facility

Lockout tagout devices, locks and tags

- Lockout tagout devices and safety locks to fit each lockout tagout point, such as circuit breakers, fuses, push buttons, plugs, switches, valves and more
- Labels and tags to mark energy isolation points

Brady offers additional products to help keep your facility safe, compliant and productive, from spill control and floor marking, to pipe markers and lean / 5S workplace visuals, too.
