Life in the laboratory becomes simpler and safer

With more than 50 years of experience, Captair Flow Smart clean-air enclosures feature HEPA H14 (or ULPA U16) filters that provide optimum protection against external particulate contamination and are designed to provide an ISO 14644-1:2015, Class 5* work environment.

Particulate free workstation

- Protection against external contamination
- Internal air quality achieved by high efficiency particulate filter(s) (HEPA H 14 / ULPA U16)
- Carbon filter (optional) to protect handlings from VOCs present in the laboratory atmosphere
- ISO Class 5* air quality in the enclosure according ISO 14644-1

Easy to clean

- Work surface is easy to clean
- Seamless worktop with smooth corners (available in TRESPA® TopLab PLUS or Stainless steel 304 L)
- Low porosity material

Ergonomic design

- 4 models available for your handlings with large openings for easy access to your work
- Slanted sash provides an ergonomic position for comfort and productivity
- High luminosity, internal LED lighting (daylight, light intensity > 800 lux)

Simpler to use

- SMART technology informs users about their protection using light and sound.
Light and sound pulses provide real time information indicating that:

- Air face velocity is compromised: check sash, pre-filter or HEPA/ULPA filter
- Fan failure has occurred

- **The eGuard App** provides remote control to monitor the workstation, change the settings, and delivers safety alerts immediately to your mobile, tablet or PC device.

Safer to operate

- ULPA U16 filters guarantee 99.99995% filtration efficiency for particles larger than 0.1 µm.
- HEPA H14 filters guarantee 99.995% filtration efficiency for particles larger than 0.1 µm.
- Add a molecular filter for additional protection from fumes and vapors present in the laboratory air.
- Air quality in the enclosure complies with EN ISO 14644-1 (ISO Class 5).
- The anemometer monitors a drop in pressure indicating that pre-filter or filter replacement is required.
